

Product Safety, Compliance, and Stewardship Policy

Trane Technologies is committed to developing and manufacturing products that are safe for our employees and customers with limited negative impact to the environment. We ensure our products are safe for their intended use(s) and comply with all applicable regulations.

To achieve compliance and product safety, we are committed to integrating Product Safety, Compliance, and Stewardship practices into our activities in the following ways.

- Assessing and managing potential hazards and risks associated with current, applicable regulations.
- Determining where products are manufactured and sold to identify applicable regulations.
- Understanding the hazards and risks associated with current, applicable regulations and effectively manage and communicate these hazards and risks.
- Meeting and maintaining compliance with applicable global, regional, national, state, and local regulations.
- Monitoring emerging issues and keeping abreast of regulatory and legislative changes.
- Evaluating new risks and regulations.
- Providing training to employees to support compliance with this policy as well as our Product Safety, Compliance, and Stewardship standards, programs, and management practices.
- Requiring our vendors, business partners, contractors, service providers, and distributors to comply with current, applicable regulations and submit declarations when requested.
- Maintaining documentation required by regulations.
- Providing documentation and declarations as requested by customers and regulatory agencies.
- Implementing Product Safety, Compliance, and Stewardship aspects into the life cycle of a product, including product design, raw material selection, manufacture, sale, service, recycling, and disposal.

Through this commitment to ensure the safety, health, and environmental sustainability, and overall well-being of our employees and business partners, Trane Technologies reaffirms its corporate commitments toward business excellence and being a truly responsible global corporate citizen.

This policy will be reviewed annually and updated as needed.

Ray Pittard
Chief Integrated Supply Chain Officer
